LOOK & FEEL DESCRIPTION

As the name of brand, Tranquility itself means peace and calm. We tried to make that feel consistent throughout the website. Primarily, we used shades of Blue and Grey color. Blue color signifies water (Beach) and grey color compliments the overall theme really well. Imagery is used carefully keeping color shades in consideration.

As primary target market of Tranquility Resorts are Luxury seekers, we tried to make layout look rich, minimalistic and informative as well. Navigation Bar itself have transparent background placed over top of header image making it look seamless and modern. Content provided on homepage showcase all the basic offerings of brand, in a way which is not excessive neither less than needed. We used combination of Segoe UI and Hind Fonts. Both are Sans-Serif. They go well with design due to their simple, well readable and recognizable look.

For effective and efficient browsing experience, In the header, we've placed the search bar and language switcher which represents its multi-lingual approach. Additionally, On the left under logo we propose booking bar (will move to header image bottom in mobile version) which would make convenient and accessible for customer to start booking process without any delay. Under Accommodation we placed 360-degree room viewer so that customer can experience what to expect before making the choice of room type. Then, Spa banner with basic information, afterwards stated Amenities offered using Icons to make them stand-out. Contact form with address details including map to locate easily. We created mid-height footer with full width having dark navy-blue background which makes content on it more visible without interfering with the design, it includes social media links along with brand logo and newsletter subscription option giving optimum opportunity for visitor to reach to the brand.

FEEDBACK

Navjeet Singh

First of all, the logo looks beautiful, it gives a kind of soothing effect to viewer. Color theme chosen works well. I like how you used kind of icons in amenities area which makes that area look pretty attractive. The only suggestion I would give is to give a bit depth to buttons, so no one would confuse. Even a bit shadow will work. I like the idea of having booking option right on top left. It looks really cool. Mobile version is good too. Thanks.

Pujan Sanura

Web page is designed well. Really impressed by the way you put functionality like 360 degree view, it would really help the viewer understand it better while sitting far away. Presentation of amenities is impressive as well. Having language choosing option is a plus. No secret, Google translate mostly does a bad job in translating web pages. Optimisation into mobile version is very nice and practical. I am sure browsing experience of both versions would be seamless.
Thanks for letting me see the webpage, hope you do well in further studies.
